

## IF MULTI BRANCHES

Login by code

Will return the branches list, and each branch needs to register an individual token, so you must send the branch id with the login by code api again.

Choose one branch, and open the session

```
?t=login
&f=login_by_code
&i=wamid.HBgMOT..MxMDAzMEMzMTQxAA==
&w=whatsapp
&c=1234
&d=device_id
&b=branch_id
```

Get other branches (scenario of switch the branch)

```
?t=login
&f=get_other_branches
&s=62020010520631296211355391735864
```

RET : other\_branches

Choose other branch, and open the session

```
?t=login
&f=switch_other_branch
&s=62020010520631296211355391735864
&b=other_branch_id
```

RET : session\_info
